manufacturing in Australia since 1937.

proudly exporting to the world.

“we are 100% Australian owned and managed”

Enware Australia is a proud manufacturer and distributor of a wide range of high quality products in the Specialist Plumbing, Adaptable Living, Environmental, Health & Safety, Water Metering and Washroom Systems markets.

We are 100% Australian owned and managed, with 3 local manufacturing sites and sales offices throughout the country and are represented in major regions throughout the world including Asia, the Pacific, the Middle East and Europe. We also distribute a number of high quality global brands, and we offer the support of full Customer Service, R&D, Projects and Technical Services teams to deliver customised, end-to-end solutions.

OUR VISION

To provide unparalleled customer satisfaction through the delivery of optimum system solutions that incorporate best quality products with advanced technology in design, manufacture and delivery.

OUR GUARANTEE

Our reputation for high quality, robust and stylishly designed products has been built up over decades and we pride ourselves on being innovative and committed to quality. Our products incorporate the most advanced technology in design and manufacture, and are backed by full product warranties.

OUR PEOPLE

The Enware team come from a variety of backgrounds to deliver the right combination of industry experience, technical and local knowledge, innovation and technology, responsive customer service and a genuine desire to provide end-to-end solutions that work for you.

“capability and capacity to design and build high quality products”

LOCAL MANUFACTURE AND SERVICE BACK-UP

Our products are designed to be robust, long lasting and durable, even for the most heavy-duty of applications. With less frequent service and parts replacement, your operation can become more efficient and reap “whole of life” cost benefits.

With 3 modern facilities for manufacturing in Australia, Enware has the capability and capacity to design and build high quality products that meet harsh Australian conditions, and are compliant with local & international standards and regulations.

In addition to our locally manufactured range, we distribute some of the world’s most reputable brands which are backed up by our local knowledge, support and service.

We can also assist with follow-up installation and service, so you have a turnkey solution that works for you.

RESEARCH AND DEVELOPMENT

We have a full Research and Development team that are highly experienced and have received industry recognition via awards for design. With a thorough understanding of market conditions and requirements, we understand that you need products that work, without compromising on stylish design.

Our R&D team design and develop our products, so we can offer customised solutions for your application or site, delivering the flexibility that you require for large or small projects without long lead times.

QUALITY ASSURANCE

Our facilities are certified to standard ISO9001 and many of our products are WELS (Water Efficiency Labelling Standards) rated.

We back our products up with full warranties and are confident that Enware products are the highest possible quality available.

“expert advice and solutions”

SPECIALTY MANUFACTURING OPTIONS

No one project or site is the same. We recognise that off-the-shelf products will not be right for every project, so we offer Specialty Manufacturing. Our local team will work with you to ensure your needs are understood and that we deliver the solution that is right for your site, your application and your budget.

PROJECT APPROACH

Our team is experienced in working on projects of scale, from initial specification, tendering, and procurement, right through to the installation and commissioning stages.

You will benefit from:

- Our in-depth knowledge of the requirements for different channels, including standards, laws, technology, training and environmental factors
- Systems that allow you immediate access to the relevant technical and product information
- Expert advice about the right products for your applications to meet specific functional requirements as well as achieving improved energy and water efficiency
- Expert advice and solutions to ensure you remain compliant

“ your operation can become more efficient and reap whole of life cost benefits “

ON SITE TECHNICAL ASSISTANCE

Waterware Commercial Services (WCS) is the service and maintenance division of Enware. Our experienced, national team of specialists are available to come to your site and assist with installations, service and maintenance, troubleshooting and training of staff to ensure smooth operation of your site.

“quality, durable and innovative products”

SPECIALITY PLUMBING SOLUTIONS

For over 80 years, Enware has been the market leader in the provision of high quality, durable and innovative products for commercial plumbing needs.

Our tapware, shower systems and valve products are suitable for a wide variety of applications and uses. They are innovative, built to last, and are designed to maximise water use efficiency and comply with relevant standards.

ADAPTABLE WORK & LIVING SOLUTIONS

Caredesign is leading the way in providing innovative and durable products for Adaptable Work & Living applications. Our products comply with industry standards and are fully adaptable, providing the flexibility needed to maximise independent living, functionality and dignity, either in an Aged Care, Health Care or In-home environment.

ENVIRONMENTAL, HEALTH & SAFETY SOLUTIONS

Enware is at the forefront of proactive safety systems, emergency response and environmental solutions. We offer a complete range of high quality, plumbed or self-contained safety showers and eye-wash systems, as well as an innovative range of products to contain and neutralise liquid or vapour spills to manage and respond to biohazards or adverse environmental events.

“ensure that you achieve best practice solutions for your site”

STAINLESS STEEL WASHROOM SOLUTIONS

Enware presents a range of Franke washroom solutions that are durable, high quality and ideal for very heavy traffic washroom environments. Our range of sinks, sanitary ware, and complimentary fixtures and fittings can help you to achieve washrooms that are functional, easy to service and maintain, and that comply with the relevant industry standards.

SMART METERING SOLUTIONS

Enware brings the most advanced metering technology to help you achieve compliance, transparency and greater accuracy in water metering. Hydrometer delivers Australia's first ultrasonic water meter and AMR system, which is designed to provide you with more information, at greater accuracy, to help you achieve greater control and make better decisions.

WATERWARE COMMERCIAL SERVICES (WCS)

The WCS nationwide service network is a professional specialist team of commercial plumbers who are experts in water conservation and management. They provide Enware product support and maintenance, as well as product design, implementation and training to ensure that you achieve best practice solutions for your site.

smart metering solutions

Enware offers the complete answer to accurate, efficient and cost effective monitoring of water usage in residential, industrial and commercial properties. Our offering includes the HYDRUS Ultrasonic Water Meter and a range of Automatic Meter Reading Solutions to suit specific applications.

The HYDRUS Ultrasonic Water Meter marks a new era in water metering based upon optimum precision and the best possible efficiency. The trend-setting ultrasonic technology enables the accurate recording of measurement data.

HYDRUS also has an integrated radio or M-Bus transmission module, which guarantees undisturbed data transmission immediately after consumption.

Our Automatic Meter Reading (AMR) solutions include the economical and introductory Walk-by / Drive-by solutions that may be upgraded to a fixed solution based upon radio or M-Bus. With the addition of a radio module to existing mechanical water meters our AMR solutions can be adapted to take readings from these meters as well.

THE KEY METERING OPTIONS ARE:

- MECHANICAL METERS
- ULTRASONIC METERS
- INTEGRATED AMR SYSTEMS, INCLUDING DRIVE BY, WALK-BY AND HAND-HELD OPTIONS
