

# NEW KITCHEN ADAPTS TO EVERYONE'S STYLE

Height adjustable lifts - for worktops and wall cupboards of your own choice

**Introducing** a new concept in kitchen design. The Indivo kitchen, where the height of all wall cupboards and worktops can be adjusted using special lifts, allowing users to work in the kitchen, whether they sit or stand.

The lifts can be adapted to most standard kitchen components allowing the flexibility to choose almost any style you like. And lifts can be used when installing a new kitchen or when retrofitting an existing kitchen for continued use.

## Flexible lifts

Being able to adjust the height of worktops and wall cupboards is a great help for almost everyone. The new Pressalit Care lifts mean that you can design your own height-adjustable kitchen.

## Height adjustment

Worktops and wall cupboards are adjusted to a comfortable height using switches on the worktop front.

The worktops can be adjusted vertically by 400 mm.

Wall cupboards can be moved diagonally, that is both vertically and forwards. From its highest position, the cupboard can be moved 350 mm downwards and 150 mm forwards.

## Safety feature

The worktop is equipped with a safety bar under the frame and the wall cupboards with a safety plate underneath. These prevent injury from pinching and crushing.
