

MONEY-SAVING ULTRA-RINSE

Enware's Australian designed and manufactured Ultra-Rinse pre-rinse spray gun delivers substantial savings for commercial food premises.

The FS729 Ultra-Rinse is the result of Enware's world-leading research and development. The improved, high-velocity spray pattern cleans faster, with less effort and more efficiently, requiring less water per unit of time.

This advanced design features a moulded rubber nozzle guard, increased water velocity, self-closing headworks and ergonomic handle.

The Ultra-Rinse can be easily retro-fitted, with the water and energy savings repaying the investment cost virtually in a matter of months.

With its impressive WELS 6 star water conservation rating, Ultra-Rinse is the ideal water saver in every food services application where water efficiency, energy savings and reliable operation are important.

PROVEN WATER AND ENERGY SAVINGS

Tested in one of Australia's largest fast food chains, Ultra-Rinse surpassed the existing imported product in water and energy savings.

• WATER SAVINGS

The Ultra-Rinse was retro-fitted to replace the existing imported unit. Metered and monitored, the direct water savings projected more than 100,000 litres saved annually at a single fixture. This equates to a water cost saving of \$120 per year.

• ENERGY SAVINGS

In this same application, the Ultra-Rinse had heated water supplied at 70°C via an electric storage water heater. At a cost of \$5.31 per kL of heated water, calculations demonstrate an energy cost saving of \$531 per annum.

• QUICKLY PAYS FOR ITSELF

Based on the above metered test, Ultra-Rinse will save a total of \$651 - which repays its investment cost in around six months. When including improvements in employee efficiency and reduced sewerage costs the ROI will be even quicker.

POTENTIAL TO SAVE THOUSANDS

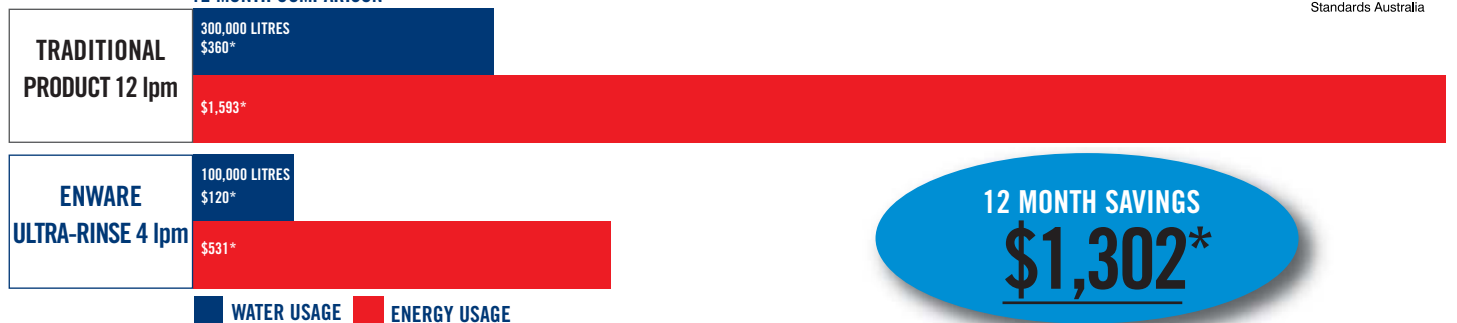

Enware's super-efficient Ultra-Rinse now brings you the potential to save thousands of dollars in water and energy costs over the life of the product. And you enjoy these superior product features:

- Improved water velocity spray pattern provides powerful performance
- Operating working pressure: 50-1200 kPa
- Easily retro-fitted with existing appliances
- Trigger operation for easy, optimum performance
- Maximum working temperature of 90°C
- High-strength alloy handle, insulated for safety
- Full surrounding dish guard bumper
- Available as Hob-mounted or Wall-mounted assemblies
- Spare parts and service advice always available from Enware
- The first pre-rinse spray in Australia to carry WaterMark approval to AS/NZS 3718, WELS 6 star rating and AS4674-2004 compliance.

1st fully certified pre-rinse spray in Australia.

* Water and energy figures shown in this table are to be used as a guide only. \$ calculations are based on \$1.20/kL water supply and \$5.31/kL heated water at 70 degrees C supplied via an electric storage water heater. Actual savings may vary based on individual site factors such as water pressure, water temperature, water heating system, water usage costs, energy costs and existing equipment. Factors excluded are improved cleaning efficiency and sewer discharge costs. For a more accurate on site assessment contact Enware.
