Chilled Drinking Water

Ensure everyone is well hydrated by providing a healthier option with instant chilled water. It's a better option than bottled water as it reduces wastage and is environmentally friendly by reducing plastic usage. Offer a constant supply of hygienic chilled mains water. Models are available to suit every application, from small offices to large industrial sites. A "must have" for factories, schools, universities, gymnasiums, municipal buildings and general public areas.

free standing water chillers

Clever and practical free-standing chillers deliver cool, fresh, mains pressure drinking water at the press of a button.

- Flow rate of up to 18 litres/hour of chilled water
- 4 Litre storage tank
- Hygienic, polished stainless steel tops designed for rapid draining
- Adjustable levelling feet
- Stainless steel storage tank
- FDA approved internal pipework
- Environmentally friendly R134A refrigerant
