

Restore Secure Anti-Ligature Solid Surface Wall Faced Pan Accessible Toilet 800mm with Grey Integrated Seat

The Restore damage resistant anti-ligature pan is made from a unique robust solid surface material that is a reliable and vandal proof softer aesthetic for institutionalised environments. Highly suited to mental health facilities, prison custody cells and detention environments, care homes, public amenities, parks and stadiums, hospitality projects and hospitals.

The front of wall installation includes a trap convertor that is shrouded within the pan and has fixing points to the wall and to the floor for ease of installation. The rimless bowl is constructed in one piece which makes it an anti-ligature, contraband proof, and secure solution for at risk applications.

Utilising modern styling, our WC pan helps normalising the environment, making use of a fully rimless hygienic flush design, with no ledges or steps within the internal bowl shape, reducing the chances of staining sanitaryware as water is prevented from staying on surfaces where lime scale can build up. The polished solid surface material allows the unit to be easy to clean and hygienic.

This raised height WC is considered as "comfort height" along with the extended projection of the pan that ensures full compliance towards AS1428.1.

PRODUCT CODE

RH-WCWFPS-ACC	Restore Secure Anti-Ligature Solid Surface Wall Faced Pan Accessible Toilet 800mm with Grey Integrated Seat
